Treating Patients With CIDP?

Consider **referring** your patient to a clinical research study:

“A Phase 3, Randomized, Double-Blinded, Double-Dummy Study Evaluating the Efficacy and Safety of Intravenous Empasiprubarb Versus Intravenous Immunoglobulin in Adults With Chronic Inflammatory Demyelinating Polyneuropathy”

The investigational study drug, empasiprubarb, is not approved by any regulatory agency for the use in CIDP as efficacy and safety have not been established.
